FULL HD 200 HZ SLIM-LED-TV

The ultra-slim 46WL743 combines energy-saving LED-technology and the latest picture processing techniques like full HD, 200-hz technology, and Resolution+. Enjoy videos, music and pictures on your TV – even directly from the Internet (YouTube™). Media data can be sent directly from a Windows® 7 PC to your TV using wireless technology.

FULL HD 1920x1080

Full HD" televisions are capable of displayingthe full high-defi nition resolution level of1920 x 1080 pixels.

200 Hz

Televisions featuring 200 Hz-technology generate additional frames between those received in the signal, quadrupling the number of individual frames per second to 200. This creates noticeably sharper movingimages, and also eliminates the problem of juddering.

LED TV

In LED televisions, LEDs (Light Emitting Diodes) are used for backlighting purposes. When LEDs are used in televisions, they vastly improve picture quality and lower power consumption.

Resolution+

"Resolution+" technology improves the picture quality produced by conventional image signals by means of a three-stage process that employs edge smoothing and sharpness enhancement techniques. This upgrades the quality of SDpictures to one that is comparable with HD.

MULTITUNER

This device offers an integrated multituner with DVB-C, DVB-T, DVB-S/S2 and an analogue reception.

Product design and specification subject to change or modification without notice. Specification correct at time of publication. Please check specification with retailer prior to purchase.
